

VEHICLE WRAP CARE

Congratulations on your new Digital Vehicle Wrap!

Your vehicle has been complimented with the industry's finest 3M automotive grade product. Depending on the 3M product implemented, the rating is from 3 to 6 years and may also qualify for the 3M MCS Warranty. This rating represents the time period that 3M Canada considers the graphics to look presentable. With extra care though it is possible to enjoy these graphics for years beyond these ratings.

Any questionable product will be inspected on an individual basis.

Pressure washers and similar devices can and will damage these graphics and these damages will not be considered for warranty. It is recommended to manually wash the vehicle with automotive grade detergent and a soft cloth or brush. High pressure washers must be under 2000 psi and held in a manner where the nozzle is no closer than 12" and the water stream is at 90 degrees to the surface. Avoid prolonged periods of water pressure in same areas.

Following these simple guidelines and using common sense will make it possible for you to enjoy your digital graphics for years to come.

Thank you.
