

VEHICLE WRAP CARE

Congratulations on your new Digital Vehicle Wrap. Your vehicle has been complimented with the industry's finest quality graphics using only the best 3M automotive grade products. The opaque laminated vinyl product is "rated" for 3 years and the laminated see-thru window vinyl is rated for 1 year although with extra special care, it is possible to enjoy these products for years beyond these ratings. The rating stands for what 3M considers to be the "3M Performance Guarantee" where these products will remain presentable during this period according to "industry standards". This means during this period, the product will not crack or delaminate from shrinkage and the digital solvent print will not fade beyond what is still aesthetically acceptable. Please keep in mind, this is an "industry rating" and not a warranty. Any product in question of it's integrity will be inspected on an individual basis to qualify for replacement.

Pressure washers and similar devices can and will damage products. Any products damaged by these means or any similar abuse will not be considered for warranty. It is recommended to manually wash vehicle with auto grade detergent and a soft cloth. Brushes can be used if done so carefully. High pressure washers must be under 2000 psi and held in a manner that the nozzle end is no closer than 12" and the angle of the water stream is 90 degrees to the product surface. Avoid aiming directly for prolonged periods at any of the products edges.

Following these few rules and using common sense will make it possible for you to enjoy your digital graphics for years to come.

Thank You.
